NOTE

I am enclosing herewith a copy of the representation received from Department of Pedodontics & Preventive Dentistry & Department of Public Health Dentistry for your kind perusal.

I would like to bring to your kind information that rural camps will be conducted from the department of Pedodontics, Public Health Dentistry & Prosthodontics almost on all working days from Monday to Saturday and on few Sundays also.

In connection with the above, Mobile Dental Van is required for the College with the specifications mentioned in the letter submitted by the above department. The same was discussion with Mr.Ramesh Makam, Transport Officer, RSST and Mr.Naveen Rodrigues, Mobile Van designer who had supplied to many Dental Colleges in Bangalore, we have received good feedback about the Mobile Van supplied by Mr.Naveen.

Hence, we request your kind self to permit us to procure Mobile Dental Van from Mr.Naveen as per the specification mentioned in the letter enclosed.

For kind orders,

Department of Public Health Dentistry  
D.A. Pandu Memorial R.V. Dental College  
CA 37, 24<sup>th</sup> Main, J.P. Nagar First Phase  
Bangalore - 560 078

To  
The Principal  
D.A. Pandu Memorial R.V. Dental College  
Bangalore

Respected Sir,

**Sub: Requirements of the proposed mobile dental van.**

As per your direction we visited Oxford Dental College and saw their Mobile dental van which has been designed by Mr. Naveen Rodrigues. It was as per the requirements of the Dental Council of India.

However our school/community oral health program caters to a minimum of around 20,000 individuals (adults and children) per annum averaging up to 250 being screened and treated daily. The areas covered are mostly in rural and semi urban areas around Bangalore city with a few outstation camps including Hosur and Tirunelveli areas. Therefore, we request that a few specific details to be considered for design of the proposed mobile dental van.

1. The vehicle should be air conditioned and of standard length (approximately 10 meters) width (2 ½ meters) and minimum height to enable axis to rural areas. However, the windows should have movable shutters.
2. It should have two dental chairs (one fixed and the other chair may be portable, if storage space is deficient).
3. The van should have 12 seats to transport the dental team to and from the venue of the oral health program.
4. This seating area should also be designed as a health education area with an LED TV for health education.
5. Carrier on top to carry the team luggage when travelling for outstation camps.
6. The van should have two compressors. (This will provide a backup pressure source if one of the compressors should fail), with requisite air/water lines and plug in points (around 6) on the sides of the van. This is to enable setting up of multiple workstations around the van and allow screening and treatment to be done simultaneously without the space restriction in addition to the fixed units within the van).
7. Interstate permit for a dedicated mobile clinic to allow the van to travel outside city limits.
8. Increased storage space within/outside the van to store and transport mobile dental units (Aseptico kits) and portable dental chairs.

These modifications will enable us to maximize the utility of the mobile dental van to suit our pattern of working. These requirements are specific and in addition to the general requirements of a mobile dental van.

Yours sincerely

Dr. Praveen P.
